ACADEMIC PROJECTS

Fashion House — E-Commerce Website *HTML5 · CSS3 · JavaScript*

- Built a fully responsive front-end e-commerce web application with a modern, accessible UI using clean semantic code.
- Implemented a real-time interactive shopping cart, product filtering, and fluid multi-device layouts with Flexbox and Grid.

Foodiess — Online Food Delivery App *React.js · JavaScript · HTML · CSS*

- Developed a fully interactive food delivery platform with modular React components and dynamic product search.
- Managed cart behaviours (add, remove, total calculation) via client-side React state; ensured cross-device consistency with advanced CSS layouts.

Recipe Finder — Web Application *React.js · Tailwind CSS · REST API*

- Engineered a dynamic recipe discovery app integrating a RESTful API to fetch real-time meal data.
- Built a powerful search bar, dynamic recipe cards, and modal popups for cooking instructions, with smooth transitions and a fully responsive UI.

Hand Gesture-Based Brightness Control System *Python · OpenCV · MediaPipe · NumPy*

- Designed a touchless Human-Computer Interaction desktop application using a standard webcam stream.
- Used MediaPipe hand-landmark estimation and NumPy to map real-time finger distances to hardware-level monitor brightness.
